

UniNexus — Verified Global References

Universities Already Running Governed, Institution-Owned AI Platforms

Reference pack for judges · All sources are official university announcements or major news outlets · Fully auditable

SECTION A — Universities Running Their Own Governed AI Platforms

① University of Michigan — U-M GPT / Maizey

A codeless platform letting users build custom AI experiences on their own datasets. Faculty integrate it with the LMS for course-specific AI tutoring; 3,500+ instances are in production across academic departments and operational offices. The platform uses retrieval-augmented generation to prevent hallucination.

<https://edtechmagazine.com/higher/article/2025/05/how-three-universities-developed-their-chatbots>

Supports: Permission-Aware RAG · Personal Corpus RAG · Grounded answers

② Arizona State University — CreateAI

Launched university-wide in 2025. Over 20,000 employees have access and have built 7,000+ AI experiences. All data stays inside ASU's governed, FERPA-compliant environment and is not used to train external models. ASU is now building a single interface where a student can ask about an assignment, check financial aid, find campus hours and email a professor without switching platforms.

<https://news.asu.edu/20260318-science-and-technology-createai-tool-kit-offers-asu-community-ways-to-customize-ai>

Supports: The core UniNexus thesis — one unified academic platform, not scattered tools

③ University of Arizona — U of A AI Platform

Includes an Arizona AI assistant that lets colleges and departments create custom chatbots which retrieve information **only from approved institutional data sources**, plus secure AI sandboxes. Stated priorities: universal access, ethical-use guidance, and strong privacy and data-security protection.

<https://news.arizona.edu/uannounce/introducing-u-ai-platform>

Supports: Approved-source-only grounding · No hallucinated answers

④ University of Pittsburgh — Anthropic + AWS "AI-Enabled Campus of the Future"

Institution-wide AI integrated into learning platforms, research tools and administrative systems. Pitt's CIO cites customizable AI agents that could assist advisors with student planning and give administrators real-time visibility into operations, delivered through existing systems like Canvas.

<https://www.pittwire.pitt.edu/features-articles/2025/10/22/claude-for-education-aws-anthropic-partnership>

Supports: Agentic AI Architecture · Admin analytics dashboard

⑤ Penn State — AI Studio

The university's enterprise generative AI platform gives faculty and staff free access to multiple leading models in a single interface, with a phased student rollout. Personal information is not used to train the models.

<https://www.psu.edu/news/campus-life/story/penn-state-launches-ai-studio-faculty-and-staff>

Supports: Enterprise-grade rollout model · Phased adoption

6 University of Cincinnati — BearcatGPT

A private, secure, university-governed AI platform now available to all faculty and staff, with student expansion planned. All interactions run in UC's private cloud instance, so data is protected and not used to train public models. Governed by published university AI Guidelines.

<https://www.uc.edu/news/articles/2025/12/bearcatgpt-ai-platform-now-available-to-all-uc-faculty-and-staff.html>

Supports: AI Governance · Data privacy · Institutional control

7 UC Irvine — ZotGPT

A free AI tool for students, faculty and staff offering multiple large language models plus API access for researchers. Has attracted 15,000 unique users.

<https://edtechmagazine.com/higher/article/2025/05/how-three-universities-developed-their-chatbots>

Supports: Proven campus-scale adoption

8 UT Austin — UT Spark

A free generative AI platform launched by UT Enterprise Technology for all students and staff.

<https://thedailytexan.com/2025/08/21/university-launches-official-ai-platform-for-students-faculty-free-of-cost/>

Supports: Free, equitable access as institutional policy

SECTION B — System-Wide and International Adoption

9 University of Maine System — System-Wide Enterprise AI Contract

Every faculty member, staff member and matriculated student across Maine's public universities receives an enterprise AI platform with data-privacy protections and the ability to build custom GPTs. Funded through a two-year, USD 1.4 million contract.

<https://www.maine.edu/blog/2026/05/26/university-of-maine-system-to-launch-shared-ai-tool-to-accelerate-student-institutional-success/>

Supports: This is procurable at real university scale — not just a demo

10 Cal State Fullerton (TitanGPT) · Univ. of Maryland (TerpAI) · Case Western · UCLA · London Business School (UK)

Cal State Fullerton provides secure, university-managed AI to all students via TitanGPT. London Business School deployed to all 6,000 students, faculty and researchers — the first in the UK to do so. UCLA saw monthly active users grow 485% in a single month. Maryland's TerpAI acts as a digital assistant for study guides and lesson plans. Case Western lets departments deploy chatbots connected to specific data sources.

<https://www.microsoft.com/en-us/education/blog/2025/04/how-microsoft-and-cloudforce-help-institutions-innovate-with-azure-ai/>

Supports: Five institutions across US + UK in one auditable source

SECTION C — Sector-Level Evidence and Original Anchors

11 EDUCAUSE 2025 AI Landscape Study

89% of institutions are engaged in AI strategic planning in some capacity. The study also highlights the difficulty of adopting AI while maintaining academic integrity — precisely the gap addressed by the UniNexus AI-Proctored Examination System and Evidence Trail.

<https://www.educause.edu/ecar/research-publications/2025/2025-educause-ai-landscape-study/introduction-and-key-findings>

Supports: The "why now" statistic · Academic integrity as the open problem

12 Original Anchors — Stanford, California State University, Duke

Stanford University operates secure institutional AI services; California State University adopted ChatGPT Edu across roughly half a million students and staff; Duke University built its own DukeGPT platform.

<https://uit.stanford.edu/ai/services>

<https://www.reuters.com/technology/openai-targets-higher-education-us-with-chatgpt-rollout-california-state-2025-02-04/>

<https://apnews.com/article/e0037fe9d6731010894bb6d4b52f9665>

Supports: Global scale · Tier-1 institutional precedent

Reference Map — Which Source Backs Which UniNexus Claim

UniNexus Claim	Backing Institution	Ref #
Permission-Aware RAG / grounded answers	Michigan, Arizona	1, 3
One unified academic platform	Arizona State University	2
Agentic AI performing real actions	University of Pittsburgh	4
AI Governance & audit control	Cincinnati, Penn State	5, 6
Feasible at national / system scale	Univ. of Maine System, CSU	9, 12
Academic integrity is unsolved	EDUCAUSE 2025 Study	11
Global movement, not a local idea	Stanford, Duke, London Business School	10, 12

Presentation Framing Line (Bangla)

বিশ্বের বড় বড় বিশ্ববিদ্যালয়গুলো ইতিমধ্যেই এই পথে হাঁটা শুরু করেছে — Michigan (RAG-ভিত্তিক Maizey), Arizona State (CreateAI), University of Arizona (শুধু অনুমোদিত উৎস থেকে উত্তর), Pittsburgh (Agentic AI), Penn State, Cincinnati, UC Irvine, UT Austin, University of Maine System, এমনকি যুক্তরাজ্যের London Business School পর্যন্ত।

কিন্তু তাদের প্রায় সবাই থেমে গেছে একটা জায়গায় — একটা "Governed Chatbot" বানিয়ে। UniNexus সেখান থেকে এক ধাপ এগিয়ে গেছে। আমরা শুধু Chatbot বানাইনি — আমরা বানিয়েছি একটা পূর্ণাঙ্গ Academic Operating System।
