- **700/- BDT** *(For single participation)
- **Extra 300/- BDT** for additional member

► Scan the below **QR code** or click on it to register

► All kinds of registration should be done through the bKash number provided in the form.

RULES

- Develop a **fully functional digital product** website using **AI-assisted tools**
- **Any programming language** or framework is allowed (**frontend and backend required**)
- Participants must understand and explain **all AI-generated parts**
- The website must be interactive and contain valid information
- **Plagiarism** or **blind copy-paste** will result in disqualification
- Submit a live demo link along with the source code repository
- **Judges' decision will be final**
- The digital product must contain the **idea of the abstract** that participants has submitted.

IMPORTANT NOTES

- Participants must be able to clearly explain their **project, code, and AI usage** to the judges when required.
- Inability to demonstrate understanding of one's own work may result in disqualification.
- Use of **unethical, illegal, or policy-violating AI tools** is **strictly prohibited. (all legal AI tools are acceptable)**
- All submissions must be original and completed within the competition timeline.
- AUSTIDC and Mindsparks-26 reserve the right to make final decisions regarding rules, judging, and results.

SUBMISSION CRITERIA

- Participants must submit a **live demo link** of their product website (**e.g., GitHub Pages, Vercel, Netlify**).
- A **source code** repository must be provided (GitHub preferred).
- The submitted website must be **fully functional**, including both **frontend and backend**.
- A **short project brief or abstract must be included, outlining the problem addressed, AI tools used, and key features**.
- Incomplete, broken, or late submissions will be disqualified or penalized.

OTHER GUIDELINES

- Participants must ensure stable internet access and required resources throughout the competition.
- All submitted links (**demo, repository, assets**) must remain active until the competition ends.
- The website should be **optimized for desktop viewing and basic responsiveness is encouraged.**
- Use of **copyrighted content without permission is strictly prohibited.**
- Teams should maintain proper **file structure, clear documentation, and readable code.**
- Any attempt to manipulate results or violate the spirit of fair competition will lead to disqualification.

MARKING CRITERIA

- Innovation & Idea Quality
- Effective & Ethical Use of AI
- UI/UX Design & User Experience
- Technical Execution & Functionality
- Presentation, Documentation & Demo

DISCLAIMER

- The organizers reserve the right to update or modify the competition rules and structure.
- **Judges decisions are final and binding.**
- The organizers are not responsible for technical or submission-related issues.
- **Participation implies full acceptance of all rules and guidelines.**
